

EDTA 9% Zinc

EDTA 9% Zinc is a high-quality liquid Zinc solution that helps correct Zinc deficiency and drives metabolic activity in plants. This easy-to-use liquid formulation is highly pure and designed for use in a variety of applications. **EDTA 9% Zinc** has flexibility with both ortho- and poly-based starters, bulk blends and/or liquid nitrogen applications.

FEATURES

- Completely chelated form of Zinc using 100% EDTA
- Highly compatible liquid formulation allows for use in a number of different fertilizer blends, including phosphate blends with a high percentage of orthophosphate
- Flexible for use across a large group of crop types in soil environments

GROWER BENEFITS

- Chelated formulation prevents zinc tie up for more nutrition into your crop and less mixing problems during the rush of the season
- Provides bioavailable Zinc in tough, high-pH soil environments or with challenging tank-mix partners
- Provides flexibility in application – **EDTA 9% Zinc** is compatible with almost all nitrogen, phosphorus and liquid potassium fertilizers, as well as many other micronutrients

RATES

1-4 qt/A for at-planting applications
 2-8 qt/A for drip, drench and in-line applications

ANALYSIS

9-0-0 9.0% Zinc
