

**LEVITATE**® is a Loveland Products' proprietary starter fertilizer formulated with a proven fertilizer biocatalyst as well as a blend of Acetate® Technology, Fulvic Acids and EDTA chelated Zinc. For users of in-line fertility, LEVITATE is the only nutrition solutions available combining three fertilizer efficiency technologies to increase nutrient availability and uptake - Levitate is the proven platform in plant nutrition.

**GROWER BENEFITS:**

- Phosphate and zinc drive early season growth and development
- Buffers the effect of salts that can harm young seedlings
- Enhances nutrient availability and uptake at a critical time

**RATES:**

Cereal Grains: Soil: 1-5 gal/A In-furrow or 2x2. Foliar: 2-4 qt/A; Legume Vegetables: Soil: 2-4 qt/A. Foliar: 1-4 qt/A; Root and Tuber Vegetables: Soil: 2-3 gal/A. Foliar: 1 gal/A

**FEATURES:**

- Low salt, root zone safe, highly compatible in-line nutrition tool for many crops and growing systems
- Contains Acetate, Biocatalyst and Fulvic Acid Technology
- User friendly liquid fertilizer with utility across many crops

**ANALYSIS:**

5-15-5 with 1.5% Zinc

 <p>Fulvic Acid</p>	 <p>SEED SAFE</p>	 <p>CHELATED MICROS</p>
<ul style="list-style-type: none"> <li>• Enhances nutrient uptake through chelation and sequestration activity and helps protect nutrients from tie-up</li> <li>• Temporarily increases CEC in application zone which helps buffer pH</li> </ul>	<ul style="list-style-type: none"> <li>• Allows for nutrition to be placed in optimal location for early season uptake</li> <li>• Decreases chance of seedling injury</li> </ul>	<ul style="list-style-type: none"> <li>• Balanced micronutrient mix to drive growth and development</li> <li>• Includes micronutrients that are key to activating other major nutrients</li> </ul>
