

Pro Iron⁵ is part of a line of Pro-Micronutrient products designed primarily for soil application but with the added flexibility of foliar uses to address the needs of a variety of crops across a range of cropping systems. Formulated with chelators and sequestering agents, addition to EDTA forms of metals, **Pro Iron 5** from Loveland Products, and available exclusively from Nutrien Ag Solutions, provides compatibility and application flexibility to provide the results growers like you demand.

FEATURES

- Formulated in the highly available EDTA form of Iron for greater availability across a range of soil types than most other forms of Iron
- Built with chelating and sequestering agents for compatibility and efficiency in many tank-mix situations
- Sound formulation is convenient and reliable in many soil environments

RATES

1-4 qts/A per application in most at-planting or drip, drench & in-line applications

GROWER BENEFITS

- Iron serves as an activator for biochemical processes, such as protein synthesis and the forming of respiratory enzyme systems
- Iron is an important part of the nitrogenase enzyme, which affects N fixation in N-fixing plants
- Provides bioavailable iron across a broad range of soil environments to aid in important metabolic processes, like protein synthesis and lignin formation

ANALYSIS

6-0-0 5% Iron
