

ReaX™ Boron is an enhanced Boron built with unique C² Technology to support soil health and plant performance. ReaX Boron is a 10% liquid Boron designed for at-planting and banded applications with foliar flexibility. ReaX Boron is designed to improve overall nutrient availability to meet the yield and quality goals of many growers in a variety of growing conditions.

GROWER BENEFITS:

- 10% boron formulation aids in crop reproduction and aids in early growth, flowering and fruit set
- Supports soil microbiota for healthier, more biologically active soil
- Stabilizes nutrients prone to movement in the soil for more reliably available nutrition

RATES:

1-2 qt/A for most crops and applications

FEATURES:

- Unique C² formulation maximizes overall nutrient availability and mobility in the soil and superior uptake in the plant
- Flexible formulation designed for many banded, broadcast, in-line or in-furrow soil applications with foliar flexibility
- Formulated to provide season-long availability of existing nutrition and applied fertility

ANALYSIS:

10% Boron with C² Technology

| WHAT IS C² TECHNOLOGY?

C² is a proprietary technology consisting of extracted Carbon and Carbohydrate reacted with nutrients for improved Soil Health and Plant Performance.

Carbon: Increases nutrient availability by fostering growth of beneficial soil microbes and positively impacting soil attributes creating better holding capacity for nutrients and water

Carbohydrate: Improves nutrient uptake and availability in both soil and foliar applications
