

Whether it's at-planting, in-season, or foliar applications, Reax K30 delivers highly soluble and readily available forms of Potassium when your plants need it. With patented C² Technology, Reax K30 provides available Potassium that remains available far longer than commodity sources. It also goes a step further and promotes release of native nutrients bound up in the soil matrix.

GROWER BENEFITS:

- 30% Potassium supports mid to late season crop development for a stronger finish to the season
- Potassium plays a key role in carbohydrate accumulation and translocation processes for structural growth and fruit yield and quality optimization

FEATURES:

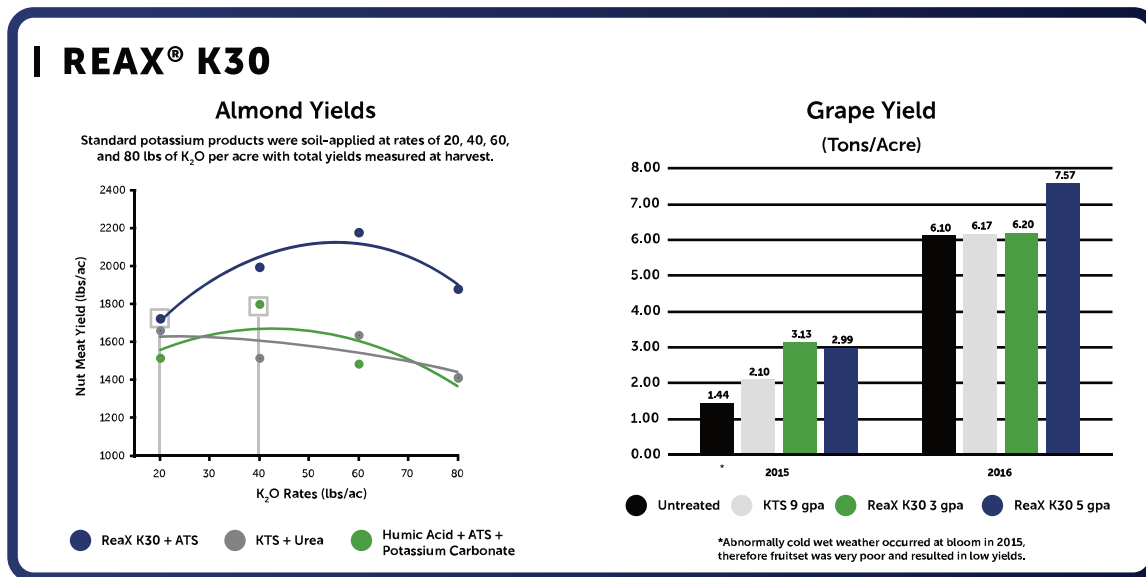

- Unique C² formulation maximizes overall nutrient availability and mobility in the soil and superior uptake in the plant
- Flexible formulation designed for drip, drench, or in-line applications as well as banded, broadcast, and in-furrow applications; but still maintains foliar flexibility

RATES:

2-12 qt/A for most crops and applications

ANALYSIS:

0-0-30 with C² Technology

ALWAYS READ AND FOLLOW LABEL DIRECTIONS.
