

Designed primarily for soil applications with Nitrogen fertilizers, **Zink-Gro™ 20** is a foundational ammoniated nutritional containing 20% Zinc for preventing or correcting severe Zinc deficiencies when used correctly in a proactive nutrient management program.

FEATURES

- Loveland Products' highest load Zinc in a liquid formulation for use and broadcast or strip-banded liquid nitrogen or potassium applications
- Ammoniated Zinc formulation blends very well with liquid Nitrogen and Potassium fertilizers for application efficiency
- Consider other Loveland Products Zinc solutions for phosphate fertilizer blends formulated to work in the most common soil environments where Zinc availability is an issue

GROWER BENEFITS

- Robust formulation can correct severe Zinc deficiency in many crops
- Maintenance rate diminishes risk of Zinc deficiency for a proactive approach to nutrient management
- **Zink-Gro 20** is designed for any crop needing Zinc-deficiency correction
- Cost effective way to address the needs of crops with very high Zinc demands

RATES

Severe deficiency: 4 qt/A

Moderate deficiency: 2 qt/A

Maintenance rate: 1 qt/A

ANALYSIS

16-0-0 20% Zinc
