

ACCOMPLISH^{CA} is an innovative fertilizer catalyst designed to significantly increase fertilizer availability and overall plant health. Accomplish CA contains concentrated biochemistry in easy-to-handle liquid form. Formulated for increased nutrient use efficiency in at-planting as well as drip, drench and in-line fertilizer applications.

FEATURES

- Powered by innovative fertilizer Biocatalyst Technology
- Compatible with most liquid nitrogen, phosphorus and potassium fertilizers, herbicides, fungicides, and insecticides
- Consistent performance across most crop and soil types

RATES

Apply 1-2 pt/A with starters; 1-2 qt/A broadcast with UAN and other liquid fertilizers; 2-3 qt/A with manures or poultry litter

MAXIMIZE PERFORMANCE WITH

GROWER BENEFITS

- Specifically designed to help growers get the most from their fertility program
- Improves nutrient availability and uptake by catalyzing mineralization of native soil nutrients
- Enhances nutrient use efficiency of applied nutrition
- Increased nutrient availability promotes better root growth and development
